

Title: SoP for Leave Application

Updated Date: 23th March 2023

Version No.: V1.0

SoP for Planned Leave Application

Process:

- An employee needs to share an internal leave application with the assigned Project Manager (would be referred to as PM) and HR via email.
- PM will consent to go ahead with client approval within 24 hours. This would be a conditional approval.
- An employee needs to get approval from the Scrum Master (Client / Internal) or client contact person after sharing the internal leave application.
- After the employee receives approval from Scrum Master, he/she shares the status with the PM.
- PM takes note of the application and shares approval over the email application.
- Project Manager and HR team approve internal leave application.
- Employee updates the internal timesheet before availing of leaves.
- An employee should make sure that all relevant ongoing activities and responsibilities are shared with an alternative point of contact before availing of leaves.

Approvers:

- Assigned Project Manager
- HR

Note:

- All Planned leaves should be discussed in the Sprint planning meeting or before sprint planning with Scrum Master (Client / Internal)
- If Planned Leaves are **3** or **less than 3** days, the application should be shared with the Project Manager, HR, and the client at least **2 weeks** before the planned leaves.
- Similarly, if planned leaves are **greater than 3** days and **up to 5** days, the application is to be shared at least three weeks ahead of PL.
- Employees will not be allowed to apply planned leaves for **more than 5** days, unless and until there is a critical event (for e.g: Marriage, Medical emergency, demise, maternal, paternal leaves)
- Any unapproved leaves will be marked as NPL.
- Any changes in leave dates after approval, will follow the process from start.

- PM will mention the reason for disapproval if at all leave application is disapproved, in the same mail trail. However, the final decision for approval/disapproval will remain with the HR team.

SoP for Emergency Leave Application

Process:

- Employees need to share leave applications with the assigned Project Manager (would be referred to as PM) and HR team via email once the employee returns to work.
- The organization understands that there are times when employees need to take leave on an emergency basis due to medical conditions or some unavoidable situations and circumstances, however, it is suggested to inform your team lead or HR and point of contact from the client, regarding Emergency Leave (EL) at least before the start of the day.
- Employees must update ELs availed in the internal timesheet.
- Employees should note that emergency leave doesn't require any approvals from the PM.

Approvers:

- HR
